- Patients with limited sight and hearing should bring a companion to ensure clear communication.
- Please let us know if your language preference is other than English.

**Our office hours are by appointment Monday through Friday. We have extended hours for both early morning and evening appointments.**

**Same day appointments are available**

When you first come to our “patient-centered medical home” we will discuss our relationship with you to ensure that our team meets your personal needs. We will answer your questions and ask that you agree to partner with us on your health care journey. After this, whenever you make an appointment, the scheduler will ask the reason for your visit. We will make the appointment with the team member who has the earliest availability, but ensure that your care is overseen or provided by your personal care provider.

We shall partner with you on your wellness journey. We will also guide you through the complex health system to help you get the care you need either from us or others. Even though you have an appointment with one team member, other members may consult with you while you are here. We want you to actively participate in the management of your health and health care

**We provide same day appointments and extended hours for your medical care needs. If you require after hour nonemergency medical care, we suggest using an urgent care center approved by your insurance**

- CVS Minute Clinic (various locations in metro area)
- Use the 800 number on your insurance card to locate an urgent care facility approved by your insurance company

### **Emergency Services**

Dr. Lucas and Dr. Oney are active staff members at Beaumont Grosse Pointe Hospital and St. John Main Hospital. If you are admitted to the hospital, your care will be managed by the .Mogaka hospitalist group.

Dr. Mogaka and his hospitalist team provide 24 hr phone coverage for our practice

Your medical records are available to Dr. Mogaka's group through the EPIC system when you go to hospitals in the Beaumont system

### **State of the Art care**

- The physicians embrace the “patient-centered medical home model.” We utilize state of the art technology including a population registry, electronic medical records, secured messaging, electronic prescribing, and access to creating and maintaining your own confidential personal health record
